Projects

Soma v2.0 · **Next.js 14 + API** [↗](#)

- Implemented a modern web application stack with Next.js and TypeScript for frontend development, utilizing Next.js 14 features for improved performance and SEO.
- Developed an in-house analytics dashboard to track user behavior and content relevance, ensuring data privacy and security.
- Employed Node.js Express and MongoDB for the backend, enabling scalability and efficient data storage with Mongoose integration.

CMS Website · **Next.js 14 + Node.js**

- Implemented a modern web application stack with Next.js and TypeScript for frontend development, utilizing Next.js 14 features for improved performance and SEO.
- Developed an in-house analytics dashboard to track user behavior and content relevance, ensuring data privacy and security.
- Employed Node.js Express and MongoDB for the backend, enabling scalability and efficient data storage with Mongoose integration.

Soma v1.0 · **MERN + API** [↗](#)

- Built with React for the frontend, Node.js for the backend, and MongoDB for data storage.
- A dynamic anime website with features like user registration, customizable themes, automated fullscreen mode, seamless episode transitions, and a user-friendly Profile Page for managing watched and bookmarked anime.

Prompt Master · **Next.js 13** [↗](#)

- Mastered dynamic Next.js 13, seamlessly integrating Google OAuth2 for user authentication.
- Showcased skills in efficient routing, serverless functions, and a robust CRUD system with tag-based search and user profile views in my debut project.

Experience

Web Developer · **Central One Bataan PH** Sept 2023 — Present

- Developed websites and applications at Central One, utilizing React and Next.js for cutting-edge experiences.
- Delved into WordPress theme and plugin development to accommodate clients seeking WordPress-based solutions.

Junior Software Eng. · **HireTalk.ai** Aug 2023 — Feb 2024

- As a junior software engineering intern, I learn from experienced colleagues and assist in coding for application development and enhancement.
- Responsible for updating and maintaining existing components to ensure smooth operation within the team.

WordPress Developer · **51 Blocks** Feb 2021 — July 2021

- I was tasked to develop reusable templates using Elementor for static pages.
- I was also responsible for executing the daily edits according to the QA, mostly pre-launch.

Other Projects

Food Blog · **MERN + API** [↗](#)

Utilized React for frontend, Node.js for backend, and MongoDB for data storage, integrating Edamam API for additional data.

Chat App · **MERN + SOCKET.IO** [↗](#)

Built frontend with React, powered backend using Node.js and MongoDB for data storage. Enabled real-time updates with socket.io integration.

Skills

Programming Languages

JavaScript, Typescript, HTML, CSS, PHP, Google Script, Python

Libraries & Frameworks

React, Next.js, Node.js, Express, Tailwind, Swiper.js, Laravel, Bootstrap

Tools & Platforms

Git, GitHub, Netlify, Vercel, WordPress, MongoDB, MySQL, Cloudinary, Grafbase, Upstash

Education

Mindanao State University - Iligan Institute of Technology

Diploma in Electronics Engineering Technology Major in Computer Maintenance & Repair

CodeGo Bootcamp

Certificate of Completion on the 12-week Fullstack Developer Course

Interests

Reading manga, watching anime, watching latest tech trends on yt, build personal projects, clean code base, proper file management.
